

Backup your website- DotNetPanel

It is recommended holding backups of your website in case files are accidentally deleted or corrupted. This guide will take you through the process of backing up your website, and then restoring this backup.

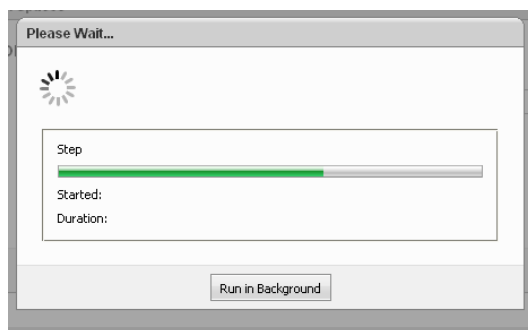

1. The first step is to log into the DotNetPanel. Visit <https://cp.eurofasthost.com/> using your web browser- whether that is Internet Explorer or Firefox.
2. Type in your login information you were provided by your welcome email. Your username will generally be your domain. If you forgot your password you can use our *“Forgot your password”* link on the front page.

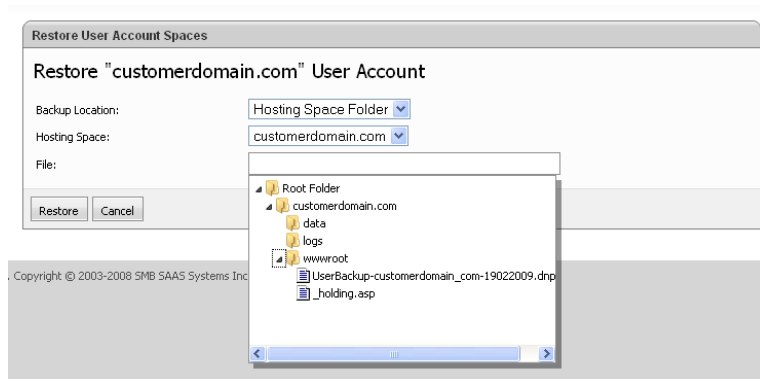

3. Once logged in you will greeted by our Account Home page. On the far right of the page will be two options- backup and restore. Click **Backup**.
4. On the next page edit the information as required. Make sure that your **Backup File Name** is easy to understand. Always include the date when the backup is being made. You can also choose where to copy the backup to, and the located of the backup **Folder**.

5. Once you have completed this click **Backup**. A screen like the one below will pop up.

6. Once this is complete click close. To restore your backup, go back to the **Account Home** page and click **Restore**. By clicking on **File** you will be presented by a drop down menu (as shown below). Using the small shapes next to the folder names, navigate to the folder where you backup resides.

7. Select the backup and click **Restore**.
